INFORMATION SECURITY POLICY

QUANTUM PROING DOO, Milutina Milankovića, Belgrade, was founded in 2020 as a limited liability company. After many years of work in design, we formed a team to offer engineering services to clients in the field of electrical power distribution facilities, using our experience and knowledge.

Our goal is to become the first and only choice for partners and end clients in the field of technical consultancy and design of electrical power distribution facilities.

We believe that success can only be achieved through teamwork. There is no more important factor in the company than employees, who contribute with their work to our culture and business results. Therefore, we direct all necessary energy and attention towards protecting employees and other interested parties who are in any way involved in our activities.

That is why we have decided, in addition to fulfilling legal regulations, to also meet the requirements of the ISO/IEC 27001:2022 standard, which we achieve through the following activities:

- Ensuring confidentiality, integrity, and availability of information through the application of appropriate protective measures
- Identifying, assessing, and managing information security risks in a systematic and regular manner
- Granting access to information and systems solely on the basis of business need and the principle of least privilege
- Reporting and recording security incidents without delay, for analysis and prevention of recurrence
- Ensuring continuity of key business processes through redundant infrastructure and regular data backup
- Transferring information security requirements to partners and associates, including Emmett Green Engineering BV (EGE), in accordance with contractual obligations and applicable sector standards
- Protecting personal data in line with current regulations, with a designated person responsible for data protection
- Raising employee awareness of the importance of information protection and proper data handling
- Continuously educating employees to improve knowledge and readiness to recognise and report security risks
- Compliance with legal, regulatory, and contractual obligations
- Constantly reviewing and improving our information security management system to keep pace with changes in the business and technological environment

All employees accept the improvement and development of the quality management system in line with the ISMS policy.

All employees accept the improvement and development of the information security system in line with this policy.

Our values are client focus, transparency in business, respect for others' resources, and professionalism in work.

We marked client trust as an absolute priority from the very first day we started operating, aware that it can only be built on knowledge, a professional approach to work, and jointly achieved results.
